Office Action Summary

Receipt is acknowledged of IDS IDS, Correction, Extension, Declaration, have 5/15; 4/3; 5/21, 8/8, and 8/8/02, respectively.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 20-52, 57-76, drawn to Barriers, classified in class 424, subclass 409.
- II. Claims 19, 53-56, drawn to method of making, classified in class 523, subclass 122.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product such as a bait.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of pesticides: ultimate species of "pesticide", as for example one of claim 7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-7, 9-18, 20-38, 39-52, 57-63 and 65-76 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of fungicide: ultimate species, as for example, one of claim 45.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, ~~1-18, 20-52, 57-76~~ are generic.

*Claim 1-3, 9-18, 20-36, 39-52, 57-63, 65-76 are generic*

*Ex II* *NC 1/14/03*  
Because Groups I, II have acquired a separate status in the art as shown by their different classification, and their recognized divergent subject matter, and the search for any one group is not required for any other group, and because a search and examination of the entire application would place an undue burden on the Examiner, the present restriction requirement is proper for examination purposes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is (703) 308-2412. The examiner can normally be reached on Tuesday through Friday 7 AM to 5:30 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on (703) 308-4628. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4556 for regular communications and (703) 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
